

## Swollen Feet and Ankles Often Mean Kidney Trouble!

Swollen ankles and feet are often due to a dropsical condition, brought about by disordered kidneys. Naturally when the kidneys are deranged the blood is filled with poisonous waste matter, which settles in the feet, ankles and wrists; or under the eyes in bag-like formations.

"It is just as necessary to keep the kidneys acting properly as to keep the bowels active," says an eminent physician. When one is sick the first thing to be done is to thoroughly test the kidney excretions.

The very best possible way to take care of yourself is to take a little hot water and "Anurie" before meals. In this way it is readily dissolved, picked up by the blood and finally reaches the kidneys, where it has a tonic effect in rebuilding these organs.

"Anurie" has been thoroughly tested in Dr. Pierce's laboratory as well as in his Invalids' Hotel, at Buffalo, N. Y. Any one can prove that "Anurie" is many times more potent than lithia, by simply sending Dr. Pierce 10c. for a trial package, or \$1.00 for a full treatment. Everyone can quickly associate Dr. Pierce with his "Favorite Prescription," so well known as an invigorator for womanly ills.

A different person daily offers his or her words of praise of "Anurie." Now Mr. S. P. HENSLEY, says:

"I recommend 'Anurie' very highly. I suffered for the last three years with catarrh of the bladder, having tried every remedy I heard of but without relief. Finally, I saw Dr. Pierce's advertisement of 'Anurie' in the paper, and, like a drowning man grasping at a straw, I thought I would try it also, which I did with great success, as it relieved me almost immediately (before I had taken all of the trial package). I can say to all who suffer from uric acid troubles or any disease of the kidneys, try this remedy and suffer no longer.

"I have great faith in Dr. Pierce's medicine."

## YOU FURNISH THE GIRL WE'LL FURNISH THE HOUSE

Is yours to be a June Wedding? Are you making your plans to furnish the home? We've a message for you that should be of real dollars-and-cents interest: Buy good furniture—it costs no more in the long run, and you have something that will be a pleasure to live with. And don't be misled into buying furniture of the store that prints showy and exaggerated pictures of an article, and shows you something entirely different. In a word—be safe, it's much better than to be sorry.

Which is only another way of saying that the store that sells thoroughly good, dependable, guaranteed furniture—that is interested in your purchases for all time, and ready to make right anything that isn't right, no matter how long you have had the furniture—that advertises exactly what it has and has exactly what it advertises—ISN'T THAT THE STORE FOR YOU? That's the People's Department Store. And we save you 33 to 50 per cent on your purchases—bought heavily and stocked up before the recent big jumps in prices, that's why.

Will you have them charged? Little later-on payments are perfectly satisfactory to us in our furniture department, and (unlike the usual installment store, which this is not) you pay nothing extra for the accommodation. We simply take the amount of your purchase and divide it up into small sums coming due on dates convenient to you. That's all. START RIGHT—LET US FURNISH THAT NEW HOME.

## New England Summer Hotels

Famous for good living and beautiful environment.

On the sea-shore, in the mountains, in the woods, or on the lakes of

### New England THE VACATION LAND

There are hundreds of such hotels, large and small, in Maine, New Hampshire, Vermont, Massachusetts, Connecticut and Rhode Island.

## BETTER OUTLOOK IN WALL STREET

Signs of Constructive Activity  
Become More Pronounced  
in Last Fortnight.

New York, May 28.—The Sun's weekly review of the financial situation tomorrow will say:

Signs of constructive activity in the stock market have become more pronounced in the past fortnight and suggested that the dealings in the share list and the course of quoted values may from now on establish a closer relation with external factors than has obtained most of the year so far, while the stock exchange was engaged with the technical troubles resulting from the state of a congestion left by the speculative excesses committed last autumn.

In the upswing which has taken place this month the average quotation of representative shares has been carried to the highest level since the latter part of January. In the meantime the average of dealings has expanded materially over the scale of the early spring. The daily comment has been made that advancing activity has brought supplies of stock into the market, but both animation and advance have been generally well maintained. These features of the recent stock exchange sessions are circumstantial proofs that new endeavor has been engaged on the constructive side. Nor does it mean much when Wall Street says, as it has been saying repeatedly of late, that professional operations obviously account for the bulk of the dealings.

### Professionals Take Lead.

All initiative in stocks is of professional origin, usually even ultra-speculative. Sometimes, quite frequently indeed, it ends there. But sometimes, and more often, it is the forerunner of a more substantial movement, for it expresses a highly expert consensus. Accordingly it is worth noting the professional judgment which the stock market may be passing on the factors of value and prospects for securities in the light of the external situation which is compounded of economic and political influences.

It seems to be the major premise of the speculative undertakings which outlined itself more clearly last week that the technical position of stocks was restored to measurable soundness by the reactionary and liquidating processes of the winter and spring. Restraints on stock market improvement imposed by the submarine crisis with Germany seem to have been lessened for the time being at least, and Wall Street is once more disposed to reflect the extraordinary profitable condition which characterizes the general business of the country. While the earnings of trade and industry, have been, and are, normal, they are none the less real. Returns to the owners and managers of enterprises have been increased by larger dividends is of astonishing proportion.

### WELL MYSTERY GIVES UP WOMAN'S CLOTHES

Fassale, N. J., May 28.—Down in the deep well on Mrs. Rine Kuken's old farm, near here, is a mystery. It made its debut a week ago, when Mrs. Kuken, manipulating the bucket, emptied a woman's middy blouse into her wash basin. Mrs. Kuken ran to a neighbor with the news. The neighbor advised more pumping, which resulted in a suit of woman's underwear. Firemen were summoned, and after an hour's industrious pumping a pair of patent leather slippers and a back comb were discovered. Convinced that the old well could give up more, the firemen used grappling hooks, but nothing more was revealed. Tomorrow powerful electric lights will be used by divers in the hope of learning the source of clothing supply.

### Wedding Ring Used Thrice.

San Francisco, May 28.—The same wedding ring which seventy-five years ago his grandfather placed on the finger of his bride, and which, thirty-five years later, his father made similar use of, was again employed as a token of plighted troth when Dwight D. Chase, a Christian Science practitioner of Oakland, married Laura Zerbe. The wedding took place at the home of Mrs. J. Arthur Logan, a sister of the bridegroom, the ceremony being performed by the Rev. A. Allen, of St. Paul's Church, Oakland.

### ALLIGATOR WRECKS TRAIN.

Lying Upon Tracks It Derailed Cars and One Man Was Killed.

Richmond, Va., May 28.—Derailment of a train by an alligator lying across the tracks near Tela, Honduras, caused the death of Henry Kinard Smith, civil engineer, son of the late Bishop Coker Smith, of the Southern Methodist Church, according to information received lately by Mr. Smith's relatives here from Robert Lansing, Secretary of State. The accident occurred March 25. As a precaution against bubonic plague the body cannot be removed from Honduras until after the lapse of four years.

### MAY PROCESSION HELD IN GEORGETOWN PARISH

Holy Trinity Church Scene of Beautiful Exercises in Which 700 Parishioners Join.

Approximately 700 persons yesterday participated in the annual May procession of the parishioners of Holy Trinity Catholic Church, in Georgetown. The procession began at 2 o'clock in the afternoon. Led by Rev. E. M. Corbett, pastor of the church, and John Hadley Doyle, president of the Washington section of the Holy Name Society, it passed over the principal streets in the vicinity of the church.

The procession was composed of members of the parochial and Sunday schools, large delegations from the Senior and Junior Holy Names Societies of the parish, a group of members of the Sodality of the Blessed Virgin, and more than 100 children who yesterday morning received their first communion. One hundred silk banners were carried by the marchers. Immediately behind the leaders marched the "queen," Miss Catherine Heide, accompanied by her maids of honor, Misses Catherine Mattare and Gertrude Conlon. The crown-bearer was Miss Margaret Kelly, and her maids were Misses Catherine Donovan and Anna May Manning.

On the return to the church, the marchers joined in the exercises of crowning the Blessed Virgin's statue, recitations, and singing of hymns, followed by the solemn benediction of the Blessed Sacrament in the church.

### Finder of Money Is Keeper.

Canton, May 28.—A decision has been rendered by the Common Pleas Court of Stark County that the finder of money is the keeper, providing the loser is never discovered. The decree was made in the case of G. W. Hupp, of Alliance, a former railway checker. About a year ago Hupp found thirteen \$10 bills in a freight car. He gave the money to the company with the understanding that he was to be the keeper if the owner was not found. Recently Hupp brought suit to get the money. The company asked the court to decide who should have the money. Hupp won.

## VICE SQUAD CASE BEING PREPARED

Prosecutors Expect to Begin  
Trial of Policemen  
This Week.

After a lapse of more than two months, government prosecutors are beginning to prepare the trial of Policemen Mason L. Howes and J. E. Elliott, who are charged with entering without warrant the home of Mrs. Rose Kennett, the widowed keeper of a rooming house at 28 Delaware avenue northeast, the night of March 18.

The date for the trial has yet to be set. It probably will be this week, though it may be further delayed. The policemen are charged with violating section 824 of the District code, which refers to trespass or invasion of premises without the consent of the owner. It does not include burglary or house-breaking, since criminal intent is not involved.

Policeman Howes is assigned to the "vice squad" and was being assisted the night of the alleged offense by Policeman Elliott, detailed temporarily to the "vice squad" work.

Mrs. Kennett's home was entered about 2 o'clock in the morning. She and her 12-year-old daughter were the only persons in the house. Both were frightened into hysterics. Mrs. Kennett swore out a warrant for the policemen, to which they surrendered. They were suspended from the police force, but were reinstated shortly afterward.

They have retained Attorneys A. A. Birney and Michael Mangan. Prosecutor Given will be assisted by another member of District Attorney Laskey's staff.

### Big Snake Ticked Him.

Columbus, Ind., May 28.—Charles Snyder went fishing near here. He was sitting on the river bank watching his line, when he felt something tickling his legs. He paid no attention to it for a little while and then remarked about the tickling sensation to his wife, who was near. Finally he decided to move and when he did so he saw a snake about five feet long that had crawled under his legs and had coiled up there, evidently preparatory to taking a nap.

### "URIC ACID NEVER CAUSED RHEUMATISM"

WANT TO PREVENT RHEUMATISM? If you have Rheumatism or Neuritis, acute or chronic—no matter what your condition—write today for my FREE BOOK on "URIC ACID, THE CAUSE OF GOUT AND RHEUMATISM." This book will tell you the most wonderful fact ever known—how to prevent a stamp—IT'S ABSOLUTELY FREE. JESSE A. GARR, Dept. 904, Rochester, Minn.

### Tarantula in His Shoe.

St. Louis, Mo., May 28.—When Gus Crivella, an Alton, Ill., fruit dealer, attempted to put his foot into his shoe the other morning, he felt something soft inside. He quickly withdrew his foot, turned the shoe upside down and tapped the bottom of it with a hammer. A tarantula, two inches long, fell out. He killed it and has it on exhibition.

### Raises Berries on Barrels.

Tipton, Ind., May 28.—John D. Smith, a well-known horticulturist, is raising strawberries in barrels this year. He has four barrels bored full of holes and filled with rich earth, and the plants are growing in the holes. The barrels revolve upon spindles. Mr. Smith says that each barrel will yield 100 quarts of strawberries.

## The Electrified Mountain Route to Yellowstone

### Nature's and Man's Mightiest Achievements

The supreme master accomplishment of the Chicago, Milwaukee & St. Paul Ry.—the electrification of its mountain divisions—will thrill you on your trip to the Pacific North Coast this year. At Butte, Mont., break your journey and make a side trip to "Nature's Old Curiosity Shop," Yellowstone National Park.

Circle Tour of Park from Butte can be made at less expense than via any other northern route.

The new great electric locomotives carry you smoothly, silently, over the vast ramparts of the mighty Rockies. There is no trailing smoke, cinders, or dust to annoy or obscure your vision of the magnificent mountain, forest and river scenery on view from observation platform of the all-steel "Olympian" and "Columbian" via the

## Can the U. S. Government Save Money by Making its Own Armor?

To the Members of Congress:

It is said the Government can make armor cheaper than private manufacturers.

Among other economies, it has been claimed that the Government could utilize naval officers as managers and superintendents, and thus avoid paying the salaries to experts which private corporations must pay.

The United States Bureau of Ordnance, in a report dated June 28, 1913, said:

"The success or the failure of a Government armor plant will depend, in a great measure, on the character and ability of the civilian experts employed.

**"Unless the Government is prepared to pay large salaries, it cannot expect to operate a successful plant."**

"Processes of armor manufacture," continued the Bureau of Ordnance, "require a high degree of metallurgical knowledge, which must be paid for at a high rate."

"Unless competent metallurgists, open-hearth superintendents, carbonizing superintendents and inspectors of heats are employed, the quality of armor produced will necessarily be below the standard of that produced by private parties by whom high salaries are paid."

There is no question of the quality of armor the American Government is now obtaining: it is the best in the world.

We offer to continue producing that quality of armor under government supervision at any price the Government itself shall name as fair.

CHAS. M. SCHWAB, Chairman  
EUGENE G. GRACE, President

Bethlehem Steel Company
